

**ENDOSSAGE RENTAL PROGRAM**  
**GreMedix LLC announces rental program for**  
**Endossage Out Patient Therapy (OPT) models**

WELLINGTON, FLORIDA, April 2, 2018 - GreMedix has initiated a short term rental program to accommodate patients that need extended home therapy on a short term basis.

The makers of Endossage have recognized that some patients may not need long term ongoing out patient therapy that warrants the purchase of a unit for indefinite home use. Some patients need only extend therapy a few weeks or months beyond the end of clinical visits to fully achieve pain free living. Furthermore, some patients may want to evaluate the effectiveness of Endossage for their particular symptoms without the financial commitment of full purchase.

Endossage OPT is now available on a rental basis.

Patients can use the unit for **\$99.95 per month** conveniently charged to their credit card. Patients will be required to purchase the appropriate attachment as recommended by their therapist in addition to the monthly charge at rental inception. This arrangement allows the patient the opportunity to experience the therapeutic advantages of Endossage for as little as \$149.90 (plus shipping) rather than the full retail purchase price o \$499.95.

About [GreMedix](#)

Our goal is to design medical devices that reach beyond the current technology. Listening to clinicians and patients, our focus is to provide products that make treatments and therapies tailored to specific needs with an ease and comfort for all involved.
